A Squadron That Excels in Drill and in the Social World.

Revelations of a Visit to the Armory on Dean Street, Brooklyn,

History has shown that in cases of stringent need the artillery of the National Guard is the most effective arm in accomplishing a State of New York there are five batteries of tation carried on against the sport of dec. artillery. The First and Second are located hunting with dogs, the opponents of this portant of all is located in the pretty little men, divided into four sections. The heavy

The Third's efficiency is due to the fact that is a Gatting gun battery and that every man in it is mounted. The Gatling guns, which are capable of discharging 500 50calibre cartridges a minute, can be de- priation to fit up a range. The main floor, spatched from point to point with wonderful speed. This being the case a small body of men can be made to do easily what a much larger body would find difficult it under different circumstances.

The Third Battery is unique in its position as a component part of the Second Brigade. It not only does work different from any other command in the brigade, but it is distinctive in its individuality. The battery is housed in a building by itself. It is composed of less than 100 men all told, so that each member is acquainted with every other person connected with the command. There is little chance for side issues. Every man's affairs of his own command, and he has but a limited opportunity to take part in squabbles like those that frequently occur in larger

A fraternal bond has been formed among the members by kindred interests, and it is cherished. The men have become used to one set of officers. They know them and know them well. They have become accusomed to obey them. Their feelings are not rankled by the intrusion of outsiders into their military life, whose individuality is not strong

corporal or a sergeant are highly sought, and tion that some day they will be able to wear them. The battery, being located by itself, holds its members in pretty much the same position as do the separate companies located about the State. It is a well-known fact that the separate companies show up to better advantage at State Camp than do the regiments, owing to the individuality of the com-

The battery is a great factor, too, as a 1864, Major Hotchkiss held command of the social organization. The gay uniforms worn by the dashing young artillerymen make his First Lieutenant, Joseph S. Amoore, In them conspicuous where ever they go. Thus 1868 Capt. Amoore resigned and First the number of applications for enlistment in Lieut. Ira L. Beebe was elected the battery is very large and the selections Captain. In 1870 he was appointed Chief of

The Third Battery Armory is located on Dean street, near Washington avenue. It is red brick building with granite fac a red brick building with granite facings.
The face of the Armory is surmounted by three towers. The armory has a frontage of 100 feet and a depth of 110 feet. It cost about \$70,000. The corner-stone was laid Sept. 16, 1885. The battery took possession Washington's Birthday, 1886.

It has no rifle range, and officers and men claim that they are deprived of revolver and carbine practice for the lack of a small appro-97 feet square, is used as a drill-room. The front wall is pierced by a doorway fit-

teen teet high, which permits the command

side of this door is the armorer's workshop On the east side is the Quartermaster-Sergeant's department-Lined along the west side of the drill-hall are four handsome cases containing saddles. On the opposite side of the floor are similar cases containing bridles, collars and other housings, a display suggestive of a harness

exhibit at a fair. Four large cases line the front wall. In these are kept the small arms of the command, polished to a degree.

Commodious galleries extend around the drill floor. The Administration Department of the battery is just back of the front gallery. This is known as the second or nezzanine floor. The stairs are at either end of the front gallery. There are rooms for the commissioned officers, the non-commissi officers, the captain and the men. All the cellings are bigb. The wood work is of highly polished oak. The paper on the walls is of a deep rose tint. The draperies are of enough to enforce acknowledgment of their peacock slik plush. The desks and chairs shoulder straps.

In the Third Battery the chevrons of a for every man in the company. The walls the men work all the harder in the anticipa- are covered with paintings, etchings and engravings, all appropriate to the place. The

cost of \$1,000.

The Third Battery has had an interesting history. In 1864 Brig.-Gen. Jesse C. Smith, commanding the Eleventh Brigade, detailed Major E. O. Hotchkiss to organize a battery. It was organized as Company A, First Light Artillery. Mustered into service in October, battery several years. He was succeeded by his First Lieutenant, Joseph S. Amoore. In Gor.
